

THE NEW DRINKING FOUNTAIN.

The granite drinking fountain, which was presented to the city by the National Humane Alliance, is nearly installed at the foot of Pearl street at Battery Park. Yesterday the beautiful granite bowl, weighing about 5,000 pounds, was hoisted to place and as soon as the plumbers finish their work on the bowl, the block and cap stone which are to surmount the bowl will be set in place. This work will probably be all finished today if weather conditions permit. The square block of granite which surmounts the large bowl of the fountain, has three bronze lions' heads on three sides of it and the fourth side is occupied by a large bronze tablet bearing the inscription "Presented by the National Humane Alliance, Hermon Lee Ensign Founder." The fountain already presents a beautiful appearance and will, when completed be a great addition to the beauties of Battery park.
